

UNIVERSITÀ DI PISA

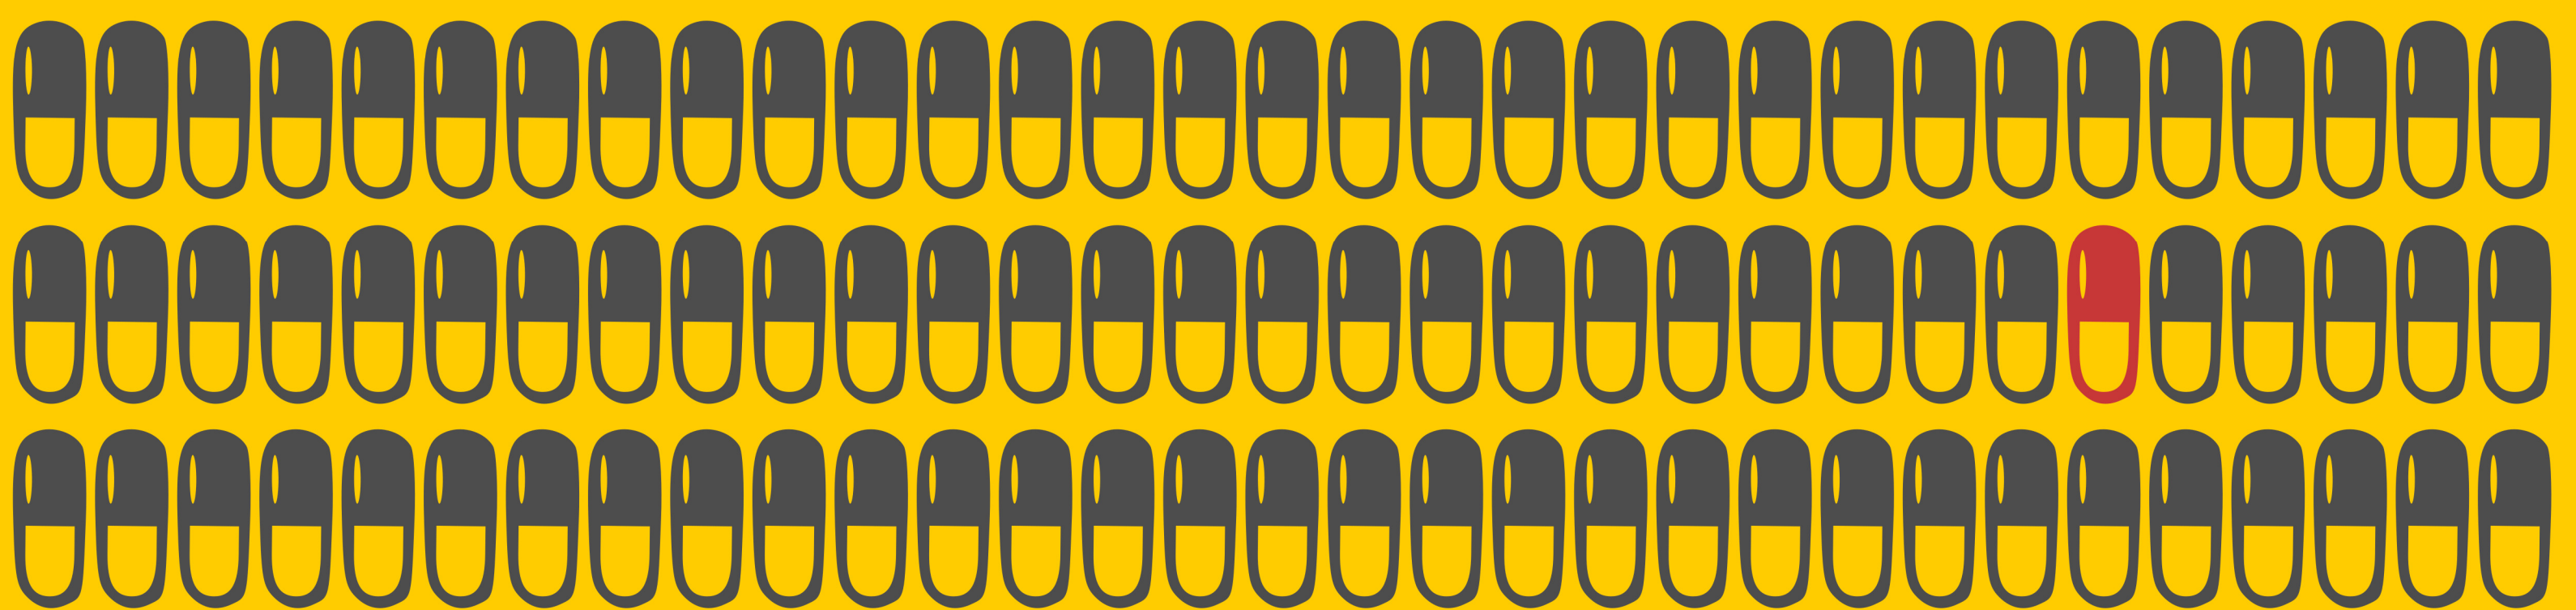

conference

accelerating the drug discovery process

bringing together academic research & industrial experience

thursday 12th december 2019

centro congressi le benedettine, pisa

international experts both from academia and pharmaceutical companies will discuss the last improvements made in the drug discovery process

program

09.00 registration

09.30 opening ceremony

|morning session|

chair: Massimiliano Runfola

10.00 Gianpiero Garau

11.00 coffee break

11.15 Eugenio Gaudio

12.15 Sheraz Gul

13.15 lunch break

|afternoon session|

chair: Simona Sestito

15.00 Michele Vendruscolo

16.00 Maria Eugenia Riveiro

17.00 round table

17.30 closing remarks

dr. Gianpiero Garau

istituto italiano di tecnologia, italy

target and interactions: back on validation

dr. Eugenio Gaudio

institute of oncology research, switzerland

protein-protein interactions as targets of anti-cancer therapy

dr. Sheraz Gul

fraunhofer ime sp, germany

exploiting the fraunhofer platforms and processes to drive innovation in drug discovery

prof. Michele Vendruscolo

university of cambridge / wren therapeutics, uk

systematic development of small molecules to inhibit specific microscopic steps of amyloid beta aggregation in Alzheimer's disease"

dr. Maria Eugenia Riveiro

e2dg, france

principles of the translational research in oncology: taking research from bedside to bedside
